

Applications

The Black Spider add-on assembly is ideal for dividing and distributing flow from an on-line dripper. Used to reduce the application rate where that of a single dripper may be too high. Used in combination with the NGE® AL dripper, it is ideal in greenhouses and nurseries where pot watering and or hanging basket irrigation systems are used.

Features

- Easy to install on the NGE or NGE® AL dripper with a 4mm male spigot outlet.
- Available in one, two or four outlet configuration.
- Modular configurations can be produced in combinations of 2 using the 2 outlet manifold.
- Tube supplied in three lengths:- 450, 600 and 900 mm.
- When connecting two or more outlets to a dripper, use either an IPS0301 or IPS0301Q. For single outlets any of the three stakes are suitable.

ORDERING INFORMATION

Code	Description
FBS1E	Single outlet barbed elbow x female adaptor
FBS1S	Single outlet barbed straight x female adaptor
FBS2	2 outlet barbed tee x female adaptor
FBS2-MA	2 outlet barbed manifold x female/male adaptor
IPS0301	Turbulent flow straight stake
IPS0301BQ	Turbulent flow barbed elbow stake
IPS0301Q	Turbulent flow elbow stake
SFH0332-18	3 mm tube x 450 mm
SFH0332-24	3 mm tube x 600 mm
SFH0332-36	3 mm tube x 900 mm
